NON-FINAL ACTION

Applicant's amendment of 7-10-06 has been fully considered.

- The deletion of "solvates" has overcome the previous rejection of 112/1st and 2nd paragraphs.
- The explanation for the bond order of D' and D'' has overcome the previous rejection of 112/2nd paragraph.
- The amended claims 8 and 9 have also overcome the previous rejection of 112/2nd paragraph.

Thus, all previous rejections are withdrawn herein.

Claims 17 and 18 have been cancelled.

Claims 1-16, 19 and 20 are still pending.

Specification

1. The disclosure is objected to because of the following informalities:
 - a. On page 22, 23 and 27, Formula (Z') has Z¹ as C(O). Variable Z¹ double bonds with Y², and so, the carbon of C(O) has 5 bonds, which would not be possible.

Claim Rejections - 35 USC § 112, First Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly

Art Unit: 1624

connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. **Not Enabled by the Disclosure:** Claims 1-16 and 20 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. Formula (Z') is an intermediate that is critical or essential to the process of making the claimed compounds, but not enabled by the disclosure since the carbon of variable Z¹ has 5 bonds. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claim Objections

3. Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 19 recites species of 5,6,7,8-tetrahydro-imidazo[1,2-a]pyrimidin-3-yl substituted with a phenyl or pyridyl group at the 8th position, which is not taught or fairly suggested by the prior art of record.

References cited on PTO-892

The cited references show state of the art. While they teach the core of , 5,6,7,8-tetrahydro-imidazo[1,2-a]pyrimidin-3-yl they also teach an oxo group (or C=O) on said bicyclic core, which is not recited in the instant claims.
